

## Exercise 1: Distribution and Concentration

Consider the following distribution of income in a fictional society of 11 people: {23, 1, 11, 24, 35, 219, 26, 8, 14, 31, 85} (in monetary units).

- a) Determine mean, median and Gini coefficient for the data.
- b) Sketch out a plot that lets you see the concentration of income with ease. To do so, first sort the data. Do not forget to properly label your diagram.
- c) Draw a box plot based on the above data. Include bottom and top outliers, if necessary. Hint: The whiskers extend the box by a length of 1.5 times the inter-quartile range. Do not forget to label all elements and axis of your plot.

## Exercise 2: Questionable Visualizations

Consider the following examples of data visualizations and discuss potential shortcomings (you will find the images on the last pages of this document). What would you do differently to improve the visualizations?

## Exercise 3: Data Visualization

In ISIS you will find a dataset `dst.csv` which shows AI literacy and satisfaction with AI for a number of people from different status groups (hl = professors, wm = research staff, stud = students, mtsv = technical and service personnel). Explore the data!

### Laws on file

If no colour appears, there is no such law on file

- 2012 election results
- Background check law
- Permit required to purchase
- Licence required to sell
- Records kept on file
- Firearms banned from workplace

### Virginia

- Voted for Obama in the 2012 election
- Background check:** not required for handguns
- Permit:** not required to buy firearms
- Licence:** not required for dealers
- Records:** kept on file for handgun owners
- Workplace:** firearms not allowed in parking lots

### Overall gun control score: 12

Virginia has a **Brady Campaign score** of 12, which is lower than the national average of 16. The score comes from measuring these and other gun laws according to a weighted points system.

### Murder rate: 2.58

There were 2.58 firearm murders per 100,000 people in Virginia during 2011, which is lower than the national average of 2.77. Overall, it is ranked #27 in murder rates out of 48 states with this data.

## States with the highest firearm murder rate

Louisiana scored only two points on the Brady scale for banning guns from college campuses. It also has the highest firearm murder rate per 100,000 people in the country. Overall, Republican states have an average Brady score of 4.6, compared to 26.73 for states that voted for President Obama in the last election.

## States with the lowest firearm murder rate

Hawaii has the lowest firearm murder rate in the United States with just 0.07 murders per 100,000 people. South Dakota is the only Republican state to rank on this list. Despite scoring only 7 points on the Brady score and enacting none of the laws highlighted on this chart, Iowa still has one of the lowest firearm murder rates in the country.

# Drinking age will remain 19 in

CBC News Posted: Mar 4, 2013 11:59 AM CST | Last Updated: Mar 4, 2013 11:55 AM CST

Canadian Centre on Substance Abuse

You have to be 19 in Saskatchewan to have a drink, while in Alberta and Manitoba, the drinking age is 18. (CBC)

The Saskatchewan Party government has ruled out lowering the drinking age, four months after party members put the issue in the public eye.
